ColorStream plastrac

The Blending Revolution is Here!

Our patented, modular, virtually maintenance-free system moves blending and color changing to ground level. No more catwalks, scissor lifts, ladders, or climbing to swap out canisters or perform maintenance. And because it is cart-based, ColorStream can move easily between multiple machines.

Join the Blending Revolution.

LOG Injection Molding Machines

Providing Solutions for Your Injection Molding Needs

LOG manufactures a wide range of high-precision, injection molding machines for diverse applications. We work with you to ensure we are providing the best molding solutions based on your application and business requirements. You can count on us for advanced technology, application expertise, and after-sales support to help improve your overall injection molding productivity and profitability. The LOG Injection Molding platforms of cost effective A series are all hydraulic with variable displacement pumps, and the energy efficient S Series servo units, spans from 90 to 2,200 U.S. tons.

S-8 SERIES MODEL	INJECTION UNIT OZ	US TONS	CLAMP STROKE INCHES	SCREW DIAMETER INCHES	TIE BAR SPACING INCHES	PRICE
90 T	5.1	100	12.6	1.4	14 x 14	\$ 62,500

Hot Runner Controller

High Quality & Robust Plastic Injection Solution

Single Zone Type

- Controlling Precisely Temperature with A New PID algorithm
- Protecting Overpower and False Connection
- Algorithm to Prevent TRIAC Breakage (Improved Cooling Efficiency of Heat Sink)
- Protection Function against Wiring Error, Heater Short, Overpower, Overcurrent

Multi Zone Type

- Controlling 6 ~144 zones
- Intuitive UI and Various Display Panels
- Monitoring Mold Files
- Testing Mold Function
- Error Report Function
- Adopting Sequence injection timer (optional 1~16 gates)
- Protecting Overpower
- Excellent Performance with 32bit Processor

There are many solutions, but only some are perfect for you

At IRS we sell machines made by European manufacturers who produce the best equipment available on the market today. Thanks to our extensive experience in the plastics sector and our OEMs, we offer: recycling / upcycling systems for plastics, extrusion systems, filtration systems, washing systems, drying systems and equipment for size reduction.

And now the filter screens too.

Our brands are: Gamma Meccanica (recycling lines for plastics), BD Plast (screen changers), Plasmaq (washing and drying systems) and Gaudenzi (filter screens and metal works since 1891).

Improved Mold Cooling

Smartflow Manifolds Meet Your Specifications

Select from corrosion-resistant aluminum or stainless steel.

Choose supply and port sizes in various thread types (NPT, BSPP, BSPT).

Many sizes in stock for quick delivery.

High Temperature and Pressure options are available to handle demanding applications.

Save time with custom assembly options:

- We install ball valves, quick disconnect fittings and hose barbs.
- Installed flowmeters and flow regulators provide visibility and individual circuit control.

NPE Show Packages Coming in 2024

Package #1 – Print ONLY

Run any size ad in our March Preview Issue, our April Show Issue and our May Post Show issue + get the SAME size ad FREE in our June issue.

Full page in each issue - \$2,100 total
Half page in each issue - \$1,500 total
¼ page in each issue - \$1,000 total

Package #2 - \$2,995 net total (valued at \$5,000+) – Integrated Package

- Run a full page in April, May and June
 - 300 x 250 in an enewsletter in March and April
 - Ad on website for 60 days from March-beginning of show
 - 4-color product image, 50 word description in the March and April issues and blasted out before NPE
-

Package #3 - \$1,995 net total (valued at \$4,000+) – Integrated Package

- Run a half page in April, May and June
 - 300 x 250 in an enewsletter in March and April
 - Ad on website for 60 days from March-beginning of show
 - 4-color product image, 50 word description in the March and April issues and blasted out before NPE
-

Package #4- Digital Package - \$1,995 net total (valued at \$4,000+) – Digital Only Package

- 300 x 250 in an enewsletter in March and April
 - Ad on website for 90 days from March-beginning of show
 - 4-color product image, 50 word description in the March and April issues and blasted out before NPE
-

Add an upgrade to any above package

Add a video and/or product eblast the week before the show.
\$1,595 net to 35,000 emails

Email **Lydia** at lydia@plasticshotline.com to learn more.

ColorStream by Plastrac

Patented ColorStream is a revolution in plastics blending. Color changes and minimal maintenance occur on the plant floor. The cart can also be moved easily to ensure unhindered access to injection molding machines and extruders when their maintenance is due. As for ColorStream's own maintenance, the system's clean low pressure transport air ensures there is nothing to clog and very little to clean. ColorStream also dramatically lowers power costs and the need for extra equipment.

<https://plastrac.com/gravimetric-colorstream-series/>

TEDERIC

Premium injection molding machinery by TEDERIC. Products range from 55t to 7000t and include servo-toggle, servo-2 platen, hybrid electric, all-electric, and specialty multi-material solutions. With more than 1000 employees and worldwide sales to more than 130 countries, Tederic has a vibrant and growing global footprint. Tederic North America provides sales, service and spare parts support to a growing number of satisfied, repeat customers across the US and Canada. Make your next machine a TEDERIC.

Innovative Recycling Solutions offers its customers two leading manufacturers in filtration

Innovative Recycling Solutions, LLC is sales agency in North America of select manufacturers of plastics recycling and extrusion equipment. Its brands are: Gamma Meccanica (recycling lines for plastics), BD Plast (screen changers), Plasmaq (washing and drying systems) and Gaudenzi (filter screens and metalworks).

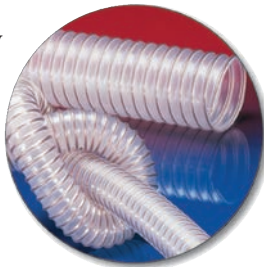

Whether we are talking about recycling or extrusion, the filtration phase of the molten material is essential to obtain a finished product of excellent quality. For this reason IRS has carefully chosen its partners, selected companies with long experience in this sector.

BD Plast is an Italian company established in 1986. The company designs and manufactures screen changers, adapters, melt pipes and accessories for polymer extrusion lines. The CleanChanger® is the BD Plast automatic hydraulic self-cleaning triple plate screen changer with automatic ejection system of the breaker plates which grants the automatic filtration with independent movement of each plate. The company is continuing to develop new CleanChanger models to meet different production needs.

Gaudenzi is an Italian company with over one hundred years of experience in filter screens and metalworks. Its products are produced according to the highest quality standards. The wide range of products and their versatility give IRS the opportunity to provide its customers with complete filter screen solutions for many of the high contamination filters. The Gaudenzi filtration range is from 70 to 2000 µm.

Top 5 Reasons to Use NORRES Industrial Hose:

1. Temperature Range: Special polyurethane designed to withstand higher temperatures (195° to 255°F)
2. Abrasion Resistance: Ability to endure abrasive materials, ensuring longer service life
3. Flexibility & Small Bend Radius: Easily maneuvered through complex material systems and tight compact spaces
4. Static Dissipation: Antistatic properties compounded into hose wall, gaining the benefits of static-free operation without a grounding wire
5. Food Grade Options: Hoses comply with food safety standards

<https://www.plastixs.com/products/hose-tubing-accessories/norres-industrial-hoses-and-clamps/>

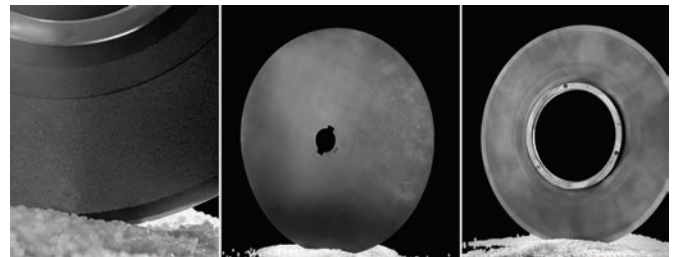

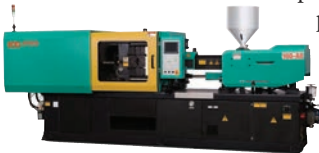

LOG Injection Molding Machine

LOG Injection Molding Machine manufactures a wide range of high-precision, plastics injection molding machine for diverse plastic molding applications. LOG is dedicated to improving your overall plastic injection molding productivity and profitability. We work with you to ensure we are providing the best plastic molding solutions based on your application and business requirements.

LOG works with you to ensure that we are providing the best molding solutions based on your application and business requirements. You can count on us for advanced technology and applications expertise to help improve your overall

plastics injection molding productivity and profitability.
