LEADERS in Plastics

Plastics Hotline would like to thank each of these companies for participating in our Leaders in Plastics program. The next few pages describes their company and their solutions in the plastics market.

Visit www.plasticshotline.com/leaders-in-plastics to learn more about the solutions these companies have to offer.

LEADERS in Plastics

HIGH QUALITY PRODUCTS, LOCAL SERVICE & PERSONAL CARE FOR YOUR NEEDS IN RECYCLING AND EXTRUSION

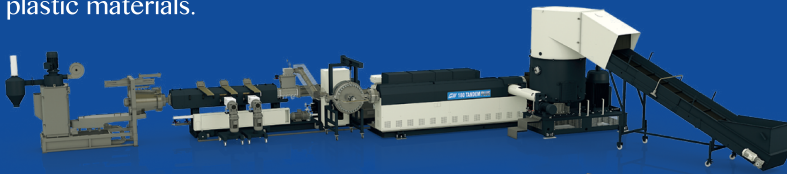

Innovative Recycling Solutions, LLC is an exclusive sales agency in North America for select manufacturers of plastics recycling, extrusion, filtration, washing, drying and size reduction equipment and systems. Quality and providing customized solutions are our strengths.

Recycling and extrusion systems can go a long way in saving time and money, but only if you purchase the right equipment from the right companies. At IRS we sell machines produced by European manufacturers who produce the best equipment available on the market today.

North American companies working with European entities could have a frustrating experience from differences in time zones, currencies and language barriers. This is why IRS acts as an intermediary and consumer advocate between you and the manufacturers, helping to avoid issues and solve problems before they arise. We don't just make a sale. We work with you every step of the way; from initial inquiry to providing service and spare parts after the sale.

THE BRANDS

Gamma Meccanica SpA. Since 1987, the company designs and produces machines and plants to recycle a wide range of plastic materials.

Bruno Folcieri Srl. Established in 1947, the company develops and builds granulators for shredding various types of plastic materials.

BD Plast Srl. Established in 1986, BD Plast designs and manufactures screen changers, adapters, melt pipes and accessories for polymer extrusion lines.

Plasmaq Lda. Established in 1992, Plasmaq is supplier of size reduction systems and washing and drying systems for post-consumer plastics.

We are more than just a sales agency

High quality equipment and customized solutions for your needs in recycling and extrusion

Thanks to our vast experience in the plastic industry and of our selected OEMs, IRS can offer you:

- recycling / upcycling systems for plastics
- extrusion systems
- filtration systems
- washing systems
- drying systems
- size reduction equipment

CUSTOMER-CENTRIC BLENDING SOLUTIONS FROM PLASTRAC

The right equipment. The right controls. The right amount of custom engineering.

For over a quarter century, Plastrac has been supplying the plastics industry with gravimetric, disc-based systems that enable efficient blending and feeding of resins and multiple additives, quick on-the-fly color changes, and simplified maintenance with next-to-no down time. The vast majority of those systems are modular in mechanical and electronic design, with parts that are easy to source and stock. When customer needs differ or change, Plastrac is ready with streamlined engineering to adapt our products to solve specific challenges.

Share your toughest challenges. There aren't many processing problems Plastrac hasn't faced and solved in the blending arena. US and Germany based operations can help you solve problems. The goal is to help you overcome blending hurdles, keep improving quality, and do it all by minimizing down time and expenses.

World's fastest color changes. The secret to Plastrac's ability to change colors as quickly as customer orders do is a self-contained level-sensing vane switch that eliminates the need for cable removal. Processors can just swap the top castings on the fly. Color changes are accomplished with essentially no down time.

ColorStream
plastrac

Coming soon - the next revolution in blending. Plastrac's latest breakthrough is huge and it is a patented design that will change the way things are blended by changing where they are blended. The result will be tremendous savings in extra capital equipment and a gigantic boost in productivity. Watch for it in 2022!

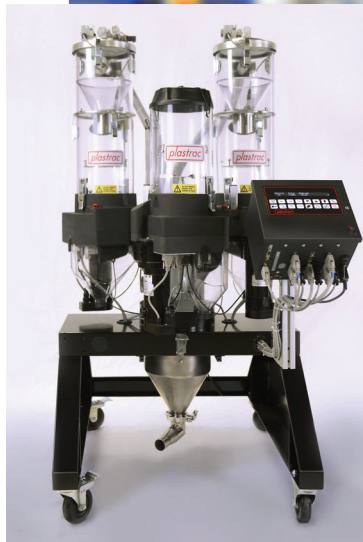

610-356-3000
Plastrac.com

The perfect blend. Every time.

More than fair shares.

Cart-based Plastrac blenders move between machines to simplify color changes and reduce scrap, especially on short runs.

To help custom molders achieve extreme efficiency, Plastrac offers fully independent single and dual cart-based blenders that can be shared between multiple machines. They are based on the value proposition of a single virgin feeder and two different color feeders with shared controller and blower system, typically operating independently with either manual color filling or an automated color loader. Operators will be able to switch colors electronically. All parts of our cart systems are easy to connect and disconnect for fast changeovers and setups.

Easy does it blending.

Now. And down the road.

Plastrac designs and builds blenders to uncomplicate life for our customers. They are simple to set up. Simple to operate. Simple to adapt in the field. Simple to expand in the future. Let's say you buy a two-component (color + additive) system now, but a few years later, you need to make it a multi-component system. Plastrac blenders are all entirely modular, so you won't be locked into the original configuration if your needs change or grow. What's more, all our parts, mechanical and electronic, are

always well stocked, because we don't think your present or future operations should include downtime.

On the fly Color Changes. PDQ.

There are a lot of features that distinguish a Plastrac blender, but none greater than the ability to change colors as often and as quickly as customer orders demand it. The secret is our level-sensing vane switch (standard on every single blender). Harried processors can hurry up color changes by swapping top castings without any need for cable removal.

LEADERS in Plastics

TEDERIC is a manufacturer of high-performance injection molding machinery. Products range from 55t to 7000t and include servo-toggle, servo-2 platen, hybrid electric, all-electric, and specialty multi-material solutions. Occupying over 1.5M sq. ft. of production space, with vertically integrated manufacturing facilities, including a casting plant, that allow Tederic to closely control the quality of critical machine components. With more than 1000 employees and worldwide sales to more than 130 countries, Tederic has a vibrant and growing global footprint. The Tederic North American operation provides sales, service and spare parts support to a growing number of satisfied, repeat customers across North America.

NEO

TEDERIC is very pleased to introduce the NEO family of injection molding machines to the North American market. Developed using proven engineering design, incorporating high-quality branded components, and enhanced by distinctive European styling, NEO machines offer a premium injection molding machinery solution at an affordable price point.

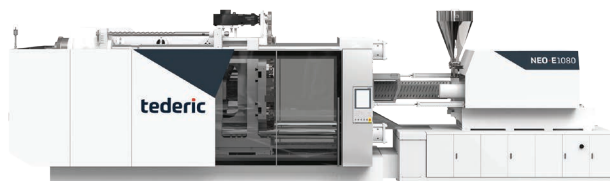

NEO-T

NEO-T is a series of servo-toggle machines in the range 90 to 500 metric tonnes. This latest generation injection molding machine from the Tederic NEO product family offers an excellent combination of durability, reliability, and accuracy. Using state-of-the-art of drives, motors, and pump technology, the NEO-T is the perfect choice for the discerning molder who wants a reliable and repeatable machine that can perform in today's demanding mold shop environment.

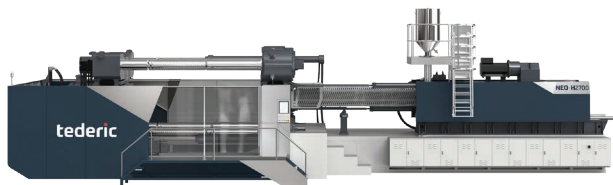

NEO-Ec

NEO-Ec is a series of hybrid-electric machines in the range 128 to 1088 metric tonnes. The NEO-Ec combines electro-mechanical clamp, injection, and screw rotation, with servo-hydraulically powered ejection and carriage movements. This combination of drive technology offers all the process benefits of an electric machine without the usual disadvantages of poor ejection and nozzle contact force. In addition, the integrated servo-pump unit also provides the necessary oil for the inclusion of hydraulic core pulling, which allows this machine to be a serious consideration for those molding facilities requiring both high precision and flexibility of use.

NEO-H

NEO-H is a series of premium servo-2 platen machines in the range 550 to 7000 metric tonnes. The NEO-H machines are modular, and each clamping unit is available with a range of injection units and screw sizes, allowing the machine to be perfectly tailored to the molder's application. Specified to offer generous tie bar spacing and large daylight, all in a compact footprint, and using the latest generation of drives, motors, and pump technology, the NEO-H offers a rugged, accurate and reliable solution for the large machine user.

NEO-M

NEO-M is a range of specialty multi-material machines:

- **NEO-Mv** features a servo-rotary platen that is integrated into the moving platen casting. Injection units of various sizes (up to 6) can be arranged in any configuration (parallel, angled, piggy-back, vertical, perpendicular).
- **NEO-Ms** features a servo-rotary platen mounted to an independently moved sled that rotates about its vertical axis. Injection units are arranged in an opposing orientation, injection through both the fixed and moving platens. Other injection units can be added as needed in any configuration (parallel, angled, piggy-back, vertical, perpendicular).

NEO series

Design drives change.

The all new NEO Series

The **NEO** family of premium injection molding machines are designed to offer stable, precise, efficient and energy saving performance.

Excellent specifications. Industry 4.0 ready controller, and leading brand componentry, all used in conjunction with cutting-edge design, produce machines that are perfect for even the most demanding applications.

Tederic is a manufacturer of premium high-performance injection molding machinery. Products range from 55t to 7000t and include servo-toggle, servo-2 platen, hybrid electric, all-electric, and specialty multi-material solutions.

In more than 1.5M sq. ft. of space Tederic has vertically integrated manufacturing facilities, including an in-house casting plant, which allows for close control of the quality of the core components of the machines.

With more than 1000 employees and worldwide sales to more than 130 countries, Tederic has a vibrant and growing global footprint.

Air Cooled Portable Chillers

Durable and Efficient

Cold Shot Chillers is a reliable source for all your chiller plastic production equipment. Our chillers are designed to efficiently remove heat from your injection mold, blow mold, and extrusion equipment.

- Standard Chiller Models Made Ready to Ship in 3 to 4 Weeks
- Onboard and Remote Diagnostic Capabilities
- Wide Temperature Range Selection with Tight Temperature Tolerance
- Non-Proprietary “Off-The-Shelf” Components Used
- Flexible Design Capabilities to Meet Your Specific Plant or Corporate Requirements
- Cold Shot Chillers Product Line Supports Applications Up to 100 Tons
- Professional Technical Sales Staff Providing Fast and Accurate Solutions
- Dependable Technical Telephone Support 24/7/365

The 2022 Buyers' Guide will be out this summer

Have you signed up to be listed yet?

Plastics

HOTLINE

The 2022 Buyers' Guide will be included in the August Print & Digital Issue

Receive a FREE Basic Listing + Logo if you run an ad in the August 2022 issue. **Deadline for a Buyers' Guide Listing is July 29, 2022.**

Be Listed as a **FEATURED SUPPLIER** in Plastic Hotline's 2022 Buyers' Guide!

Be part of our Featured Suppliers alpha section at the beginning of the printed (and digital) edition in August with your company name, logo, 30 word description, phone, and email of your choice + additional exposure as a Featured Supplier in our Buyers' Guide Digital Edition eblast!

Add-On to one of the packages below: **\$150**

2022 Buyers' Guide Print & Online Listing Packages:

BASIC LISTING:

- Includes company name, address, phone/fax, URL
- Listed in up to 3 product categories
- [View a sample on our Online Buyers' Guide](#)

Total: \$75/12 month package

DELUXE LISTING:

- Basic listing plus...
- Boldface listing in print and online
- Logo in print & digital edition of August Annual Buyers' Guide issue
- Unlimited product categories in print & online
- Social media graphics in your listing with links
- Your video in online listing for a year
- [View a sample on our Online Buyers' Guide](#)

Total: \$195/12 month package

THE BEST LISTING:

- Deluxe listing plus...
- Company description online (up to 300 words)
- Appear at the top of all buyers' guide categories when searching
- 2 product images in your online buyers' guide listing
- 2 spec sheets in your online buyers' guide listing
- 2 videos in your online buyers' guide listing

Total: \$395/12 month package

Buyers' Guide Add-Ons:

ADD COMPANY LOGO

- Your company logo in product categories
- Located in both print and digital Buyers' Guide

\$95 (each add'l one is \$75)

2" or 3" MINI-AD

- Mini-ad in product categories
- Located in both print and digital Buyers' Guide

2": \$150 (each add'l one is \$125)

3": \$175 (each add'l one is \$135)

All Buyers' Guide packages include a listing on our website for one year and a listing in our August 2022 print and digital issue.

[Click here](#) for a list of Buyers' Guide categories.

How Do I Get Listed?

Contact Lydia to make sure your company is listed in the 2022 Buyers' Guide.

INNOVATIVE ROBOTICS LINE FOR PLASTICS INJECTION MOLDING !

H5 Series !

Heavy Payload , Low ceiling !

H5 SERIES

- Molding Machine Size : 750 ~ 4,000 Tons
- Full Servo Robot up with 5 Axis AC Digital Servo.
- Industry First !. raverse (1 Axis) + Articulated Robot (4 Axis)
- Heavy Payload, Low ceiling & Less foot print
- Application : Basic Take out, Stacking, Insert Over Molding, Gate cutting, 2ndary automation!
- Features : High Strength Steel Frame, Powerful AC servo Motor, High Precision NSK Liner Motion Guide.

H5-C10 Controller

- 7" Wide Touch Screen
- ARM Cortex-A8 CPU, DDR2 512 MB
- Body Attached I.O box
- High-Performance EtherCAT Communication
- User-Friendly Icon-Based Control Screen.
- Developed with 30 years experience in the plastics molding industry.
- CE Certified Components, ISO 9001 Quality Production.

EPIK SERIES (Single or Double Arm Model)

- Molding Machine Size : 200 ~ 800 Tons
- Single or Double Arm Model (3~7 Axis AC Servo Control)
- Control : HYK-70 (Keba) Controller
- Application : Basic Take out, Stacking, Insert Over Molding, In Mold Labeling and Other 2ndary Automation, Sprue Picking
- Features : High Strength Steel Frame, High Strength AC servo Motor, Low Noise NSK Liner Motion Guide

HYK-70 (KEBA) Controller

- 7" Wide Touch Screen
- 1.2 GHz, ARM Cortex-A9 Core
- Ergonomic Design,
- High-Performance EtherCAT Communication
- High Quality Components, ISO 9001 Quality Production.
- User-Friendly Icon-Based Control Screen.
- Mode and teaching type programming for beginner mode
- Line by line programming for expert mode

ISO9001 QUALITY

CE CERTIFIED

EPIK-W SERIES (Flat Front Style Robot)

- Molding Machine Size : 400 ~ 4,000 Tons
- Flat Front style Robot with Single Arm Model
- Control : HYK-70 (KEBA) Controller
- Application : Basic Take out, Stacking, Insert Over Molding, In Mold Labeling and Other 2ndary Automation.
- Features : Longer parts handling, Low ceiling.

UNIK- SERIES (Mini Servo Robot)

- Molding Machine Size : 50 ~ 200 Tons
- Single or Double Arm Model
- Control : HYK-70 (KEBA) Controller
- Application : Take out, Stacking, Gate cutting, 2ndary Automation, Light Application.
